Bonemold Formula

Delvin,
Here's the formula for the Improved Bonemold I mentioned in my last letter. Take whatever gold you make from the sale and make sure our little sister is taken care of.

Ingredients:
4 cups of bone dust
1 cup void salts
1 bottle of netch jelly
1 cup of ground stahlrim chips
1 bucket of fresh water

Add the bone and void salts to the water and allow them to soak for at least a full day. Then add the netch jelly and stahlrim chips to the bucket. Stir over a hot flame until the mixture begins to harden. Pour the mixture into the desired mold and set the mold in the center of your forge. Fire the mixture in the forge for at least a half day. Let the mixture cool and then remove from the mold.

Glover Mallory
