Umana's Journal

It's been about a week since Valie went missing and now Endrast is gone too. We found blood leading over to the barred off doorway, but Sulla seems to think that they found a way through and that they are trying to cut him out of the discovery.

He keeps saying that we need to press on. We've manage to break through into another section of the ruins, an "Animonculory", where the dwarves would produce their automatons.

We learned the hard way that the metal creatures are still alive in there and it hasn't improved Yag's mood at all. She holds that the Khajiit brothers aren't involved with the disappearances and has been keeping a hard eye on Sulla.

The rations have all but run out and we are going to have to decide soon whether to brave the storm or try to push further into the ruins. I don't know if the echoes of screams I've heard in my sleep are those of our missing comrades, or my own nightmares.
