Titelloses Buch, Band III

Early Typeface
Experimental Family

Three Variations Available Online

The only way to get rid of a temptation is to yield to it. Resist it, and your soul grows sick with longing for the things it has forbidden to itself, and knows that they are altogether out of its reach. Two roads diverged in a yellow wood, and sorry I could not travel both and be one traveler, long I stood and looked down one as far as I could to where it bent in the undergrowth; then took the other, as just as fair, and having perhaps the better claim, because it was grassy and wanted wear; though as for that the passing there had worn them really about the same, and both that morning equally lay in leaves no step had trodden black. Oh, I kept the first for another day! Yet knowing how way leads on to way, I doubted if I should ever come back. I shall be telling this with a sigh somewhere ages and ages hence: two roads diverged in a wood, and I took the one less traveled by, and that has made all the difference.

Natural fall of new zinc atoms near water in an environment that is slightly acidic or basic. Over time, a protective layer of zinc carbonate forms on the surface, which helps prevent further corrosion. This layer is usually dull gray and can be seen on old zinc roofs or gutters. Zinc is also used in alloys like brass, which is a mix of zinc and copper. Brass is more resistant to corrosion than pure zinc and is used in many decorative items. Zinc is also used in batteries, where it acts as the negative electrode. In these batteries, zinc reacts with an electrolyte to produce a flow of electrons, which can be used to power devices. Zinc is also used in the production of rubber, where it helps to improve the strength and durability of the material. Zinc is also used in the production of paints and coatings, where it helps to protect the surface from corrosion and weathering. Zinc is also used in the production of fertilizers, where it helps to provide plants with the nutrients they need to grow. Zinc is also used in the production of animal feed, where it helps to improve the health and growth of animals. Zinc is also used in the production of cosmetics, where it helps to protect the skin from the sun and other environmental factors. Zinc is also used in the production of sunscreens, where it helps to block the harmful rays of the sun. Zinc is also used in the production of ointments, where it helps to soothe and heal the skin. Zinc is also used in the production of shampoos, where it helps to clean and condition the hair. Zinc is also used in the production of soaps, where it helps to clean and moisturize the skin. Zinc is also used in the production of detergents, where it helps to clean clothes and other fabrics. Zinc is also used in the production of fabric softeners, where it helps to make clothes feel soft and smell fresh. Zinc is also used in the production of air fresheners, where it helps to neutralize odors and make the air smell fresh. Zinc is also used in the production of deodorants, where it helps to prevent body odor and keep the skin dry. Zinc is also used in the production of antiperspirants, where it helps to reduce sweating and keep the skin dry. Zinc is also used in the production of foot powders, where it helps to absorb moisture and prevent fungal infections. Zinc is also used in the production of diaper rash creams, where it helps to protect the skin from irritation and inflammation. Zinc is also used in the production of baby powders, where it helps to absorb moisture and prevent rashes. Zinc is also used in the production of baby lotions, where it helps to moisturize and protect the skin. Zinc is also used in the production of baby shampoos, where it helps to clean and condition the hair. Zinc is also used in the production of baby soaps, where it helps to clean and moisturize the skin. Zinc is also used in the production of baby detergents, where it helps to clean clothes and other fabrics. Zinc is also used in the production of baby fabric softeners, where it helps to make clothes feel soft and smell fresh. Zinc is also used in the production of baby air fresheners, where it helps to neutralize odors and make the air smell fresh. Zinc is also used in the production of baby deodorants, where it helps to prevent body odor and keep the skin dry. Zinc is also used in the production of baby antiperspirants, where it helps to reduce sweating and keep the skin dry. Zinc is also used in the production of baby foot powders, where it helps to absorb moisture and prevent fungal infections. Zinc is also used in the production of baby diaper rash creams, where it helps to protect the skin from irritation and inflammation. Zinc is also used in the production of baby powders, where it helps to absorb moisture and prevent rashes. Zinc is also used in the production of baby lotions, where it helps to moisturize and protect the skin. Zinc is also used in the production of baby shampoos, where it helps to clean and condition the hair. Zinc is also used in the production of baby soaps, where it helps to clean and moisturize the skin. Zinc is also used in the production of baby foot powders, where it helps to absorb moisture and prevent fungal infections. Zinc is also used in the production of baby diaper rash creams, where it helps to protect the skin from irritation and inflammation.

Vessels Abbreviation Vessel Number

The ship was carrying a cargo of wool and cotton when it sank in the storm. The crew of twenty-three men and two women were all lost. The ship was owned by a merchant named John Smith. The ship was built in 1850 and was 120 feet long.

ANGELS FLY ONE WAY THE SPACE WE SHARED
CAN NOT BECOME THIS HARD FLOOR
CRYSTALLIZE SPECTRUM LIGHT SCATTERS AS RAINBOWS
ACROSS THE WALLS AS I TURN MY
HEAD SEE THE ATMOSPHERE CRACK CAN YOU FEEL THIS
FREEZING BUBBLES CRAWL CAN YOU
NOTICE THE CHANGES AS THEY HAPPEN WE
ARE BREATHING FASTER NOW WE
ARE RUNNING OUT OF TIME AND
AIR THERE IS NO WAY TO FREEZE SPACE
METAL LIGHTS CRACK LIKE GLASS
UNDER OUR FEET

THE FOUNDATIONS SHATTER AND EVERYTHING

CAN WE FIND THE WAY BACK TO THE ATMOSPHERE IN
TIME THEY ARE GONE AND WE ARE
ALONE THE ONLY SOUND I HEAR IS
MY BREATH AND MY HEART BEATING
FASTER AND FASTER AS I REALIZE
THERE IS NO AIR LEFT IN MY SUIT
AND NO WAY BACK TO THE SHIP
I WATCH MY FRIENDS FREEZE AND
SHATTER AS THEY TOUCH THE
ATMOSPHERE AS I AM
FLOATING ALONE IN THE
DARKNESS AND COLD
