Font Name
Font Note

Font Size and Included Glyphs

Font size is not the only factor that affects how much space text takes up. The number of glyphs included in the font file can also have a significant impact. Glyphs are the individual characters, symbols, and ligatures that make up a font. A font with a large number of glyphs will be larger than a font with a small number of glyphs, even if they are both the same size.

Font Size and Font Weight

Font size is not the only factor that affects how much space text takes up. The weight of the font can also have a significant impact. Font weight refers to the thickness of the strokes that make up the characters in a font. A font with a heavy weight will be larger than a font with a light weight, even if they are both the same size.

Chapter Four: The Long Road

Section Three: Unexpected Visitors

Soon we met more and more travelers on the road, some
riding in carts and some walking beside their animals.
Most looked tired and dusty, and many carried bundles
of belongings on their backs. We passed a farmer
leading a donkey loaded with sacks of grain, and a
family with three children who stared at us with wide
eyes. Each time we met someone, Father would call out
a greeting and ask whether they had come from the
direction of Millbrook, hoping for news of Mother and
Thomas. Most shook their heads, but one old woman
said she had passed a boy matching Thomas's
description two days before, and that he had been
walking quickly and looking straight ahead.
